Worked with REST APIs to retrieve and Display Data from Databases  
Designed and developed dynamic and Responsive Mobile Applications using Flutter, Dart, Provider, and GetX for State Management.  
Implemented coding standards and version control for high-quality code .  
Worked as an MVC And MVVM Architecture .

## PROJECTS

### ECOMMERCE CART [GitHub](#)

Utilized Provider for managing the state of the cart, ensuring real-time updates across the app.  
Designed a user-friendly cart interface that displays product images, names, quantities, and prices.  
Implemented coding standards and version control for high-quality code.  
Added a feature to display total cart value dynamically as users add or remove items.

### NEWS APP [GitHub](#)

Integrated the News API (newsapi.org) to fetch and display the latest news articles from various sources. Used GetX for state management, ensuring a reactive and efficient UI that updates dynamically as new data is fetched. (Shimmer Effect)  
Implemented coding standards and version control for high-quality code.

### PLANT APP - UI [GitHub](#)

Crafted a visually stunning user interface inspired by natural elements, with a calming color palette of greens and earth tones.  
Focused on creating intuitive navigation and user interactions, including swipe gestures, tap-to-view details, and drag-and-drop elements.

### TODO APP [GitHub](#)

Integrated the Sqflite database for efficient local storage and management of tasks.  
CRUD (Create, Read, Update, Delete) operations to allow users to add, edit, delete, and retrieve tasks .
